

# Flourish in the comfort of your own home.

Hamaspiik offers special waiver services that help you modify your home and receive hospital-grade care in your chosen community. Our staff will assess, plan, and support your stay-at-home needs. Throughout it all, you are the primary decision-maker, working in cooperation with providers to develop a plan. The result? Increased independence, greater community inclusion, and productive activities.

**All Hamaspiik Specialty Services are available for NHTD- and TBI-eligible individuals.**

**NHTD** (Nursing Home Transition & Diversion)

## Get care where you're comfortable.

The NHTD waiver helps individuals with disabilities and senior citizens live safely in their own communities. Whether it means coming back

home from a nursing home or avoiding going there altogether, Hamaspik is there for you.

**TBI** (Traumatic Brain Injury)

## You deserve to decide where you live.

Individuals who have experienced a traumatic brain injury deserve to make their own life choices like everyone else. That means TBI

sufferers can decide if they'd prefer to receive their essential medical care at home, from caregivers they know, rather than a hospital setting.

## All Hamaspik Specialty Services are available for NHTD- and TBI-eligible individuals.

### Onboarding & Guidance

Start the journey to home.

Hamaspik's knowledgeable service coordinators will secure the waiver you need, guide you through the Medicaid process, and help you procure the invaluable resources you may have not known were available.

### Moving Assistance

All packed up and ready to go.

Hamaspik Specialty Services is there to ensure that your living environment is safe and viable for the high level of care you need. If your current home is not conducive to your needs, we provide professional packing and moving services for all your possessions and furniture.

### Environmental & Vehicular Modifications

Stay where you are—no matter what.

No one should ever have to leave their home because of a physical impairment. Constructive alterations to a home or vehicle (like ramps, lifts, handrails and much more) help our clients get around with more safety or independence, allowing them to stay home.

### Assistive Technology

High-tech equipment to equip you for living.

Receive durable, high-quality medical equipment and supplies that increase your independence, safety, and functional limitations within your home and community. Your Hamaspik service coordinator will help you get assistive equipment approved for funding.
